PROFESSIONAL SUMMARY

Results-driven Java Full-Stack Developer with hands-on experience designing and deploying scalable web applications using Spring Boot, React, and MySQL. Proficient in RESTful API development, role-based access control (RBAC), third-party API integrations, Spring AI, and Agile/Scrum delivery. Passionate about clean, maintainable, and high-performance code.

TECHNICAL SKILLS

Languages: Java, JavaScript

Frontend: React, HTML5, CSS3

Backend: Spring Boot, Spring Security, RESTful APIs, Maven, MVC Architecture, OOP

Database: MySQL, JPA, Hibernate

Messaging & Integration: RestTemplate, WhatsApp Cloud API, JavaMail API

Tools: Git, GitHub, Postman, JIRA, Power BI, Excel

Methodologies: Agile, Scrum, Sprint Planning, Code Review, CI/CD

PROJECTS

- EduStream** | *React, Spring Boot, MySQL, TypeScript, Tailwind CSS, Spring Security* Jan 2026 – Apr 2026
- Engineered a full-stack School Management System with role-based access control (RBAC) for Admin, Teacher, and Student portals using React and Spring Boot MVC architecture.
 - Architected RESTful APIs for attendance tracking, marks management, fee management, and hall ticket generation using JPA and Hibernate with optimized MySQL queries.
 - Integrated WhatsApp Cloud API for bulk notifications serving 500+ students; automated email receipts via JavaMail API, reducing manual administrative workload.
 - Built a responsive, mobile-first UI using Tailwind CSS and Framer Motion ensuring consistent UX across all screen sizes.
- Role Based IT HelpDesk** | *Java, Spring Boot, MySQL, HTML, CSS, JavaScript* Mar 2026 – Jun 2026
- Developed a secure full-stack IT Help Desk system with complaint ticketing, IT asset tracking, engineer assignment, and VC room booking features. Implemented role-based access control using Spring Security, JWT authentication, and BCrypt password hashing for User, Engineer, Admin, and Super User roles.
 - Built REST APIs and MySQL database modules for ticket management, asset registration, status updates, workload tracking, complaint transfers, and audit logging.
 - Created responsive dashboards to monitor ticket status, engineer availability, asset details, and complaint history.

EXPERIENCE

- Software Developer Intern** Jan 2025 – Mar 2025
BRV Technologies Private Limited Hyderabad, Telangana
- Built and deployed full-stack applications using Java, Spring Boot, and React across 3+ production-grade projects with real business requirements.
 - Led backend development, designing optimized RESTful APIs and implementing business logic using OOP principles and Spring MVC architecture.
 - Followed Agile/Scrum with sprint-based delivery cycles; conducted peer code reviews, improving code quality and accelerating team knowledge transfer.

CERTIFICATIONS & VIRTUAL EXPERIENCE PROGRAMS

- Software Engineering Virtual Experience** 2026
JPMorgan Chase & Co. – Forage
- Integrated Apache Kafka into a Spring Boot microservice to consume and deserialize high-volume transaction messages using a configurable topic and embedded Kafka test framework.
 - Implemented transaction validation and persistence logic with Spring Data JPA and an H2 SQL database, including entity modeling and balance updates across relational User records.

- Connected the service to an external REST Incentive API using RestTemplate, processing incentive responses and incorporating them into transactional workflows.
- Developed a REST endpoint for querying user balances, returning JSON responses through a Spring controller; verified system behavior using Maven test suites and debugger-driven inspection.

Technology Virtual Experience

2026

Deloitte Australia – Forage

- Completed a job simulation involving development and coding tasks, applying software engineering practices to real-world business scenarios.
- Wrote a structured proposal for creating a data dashboard, outlining technical approach, data sources, and visualization strategy.

Data Analytics Virtual Experience

2026

Deloitte Australia – Forage

- Completed a data analysis and forensic technology simulation, applying analytical techniques to uncover insights from business datasets.
- Built an interactive data dashboard using Tableau to visualize key metrics and support data-driven decision-making.
- Used Excel to classify and clean datasets, drawing actionable business conclusions from structured data analysis.

EDUCATION

Bachelor of Technology – Computer Science Engineering

Nov 2021 – Jul 2025

Indur Institute of Engineering & Technology (IJET)

Siddipet, Telangana

- CGPA: 6.6 / 10.0 | Key projects in Java, Spring Boot, React, Spring AI | Active in technical clubs and coding contests.

PROFESSIONAL SKILLS

Problem Solving | Team Collaboration | Design Thinking | Visual Design | Communication | Analytical Thinking
